Summary

DevOps Engineer at NTT DATA with a strong foundation in DevOps principles, CI/CD pipelines, Cloud Computing, and Infrastructure as Code (IaC). Skilled in Python and experienced in streamlining development workflows to improve efficiency and operational performance. Demonstrated success in implementing DevOps best practices to drive process optimization and deliver scalable solutions. Eager to embrace emerging technologies and deliver innovative strategies to support organizational growth.

Skills

- **Python**, Java, HTML, Shell Scripting, OracleDB, RDBMS, OOP, GitHub Actions, MongoDB, SQL, NoSQL, Git.
- Jenkins, Prometheus, Grafana, Maven, Gradle, Linux, CLI, Bash.
- **Azure** (VM, AKS, Blob, Functions, SQL DB, VPC, Azure DNS, IAM, Load Balancer), Cloud Computing, CI/CD, **AWS** (EC2, S3, EKS, AWS IAM, Amazon VPC), RESTful Web Services, Lambda, REST APIs, SOAP, XML, JSON, YAML.
- **Terraform**, Ansible, DevOps, **Docker**, JIRA, **Kubernetes**, CI/CD, Jenkins, Monitoring, ELK stack.

Experience

DevOps Engineer

NTT DATA

Noida, India 10/2021 - 11/2024

- Developed and maintained Python scripts to automate workflows and containerized multiple applications using Docker, ensuring seamless deployment on both **AWS and Azure** cloud infrastructures.
- Created end-to-end **Infrastructure-as-Code (IaC)** for multiple environments using **Terraform** on both AWS and Azure, leveraging services like **EC2, S3, RDS, VPC (AWS)** and **Azure Virtual Machines, Blob Storage, SQL Database, Virtual Networks (Azure)**.
- Led the development of several products E2E, from identifying system requirements and partner dependencies to workload balancing, software implementation, engineering, testing, and configuring metrics, alarms, monitors, and dashboards.
- Implemented monitoring and alerting by scripting solutions using Python with the ELK Stack (Elasticsearch, Logstash, Kibana) on AWS, providing real-time insights into application performance and infrastructure health, reducing service downtime by 20%.
- Designed and developed **automation workflows** between cloud services through **CI/CD pipelines** using **GitHub Actions for AWS and Azure DevOps for Azure**. Integrated **AWS Secrets Manager and Azure Key Vault** for secure information management and **SonarQube** for continuous code quality inspection.
- Developed **Helm charts** for Kubernetes orchestration using **EKS (AWS) and AKS (Azure)**, automating infrastructure tasks through Terraform.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, load testing, unit/integration/e2e testing.
- Migrated Repository and CI/CD pipelines from GitHub to Azure DevOps.

Sr. Software Engineer

NCG Global(Client: Orange Business)

Gurugram, India 03/2026 - Present

- As a DevOps Engineer worked on migrating applications from a private cloud environment to Microsoft Azure.
- Provisioned and managed Azure infrastructure using Infrastructure as Code (Terraform/ARM).
- Containerized applications using Docker for consistent deployments.
- Deployed, configured, and maintained Kubernetes clusters to support application workloads.
- Built and maintained CI/CD pipelines using Azure DevOps.
- Monitored and troubleshooted infrastructure and application deployments to ensure high availability.

Education

Bachelor of Technology

Dr. APJ AKTU

Lucknow, India 2022

- Computer Science and Engineering

Intermediate

Mercy Memorial School

Kanpur, India 2017

- PCM
